

# RELIABLE AND QUICK INSTALLATION ON PITCHED ROOFS

www.esdec.com

# THE 4 COMPONENTS **OF CLICKFIT EVO**

## 2. MOUNTING RAIL

- 30% stronger
- 30% lighter
- Suitable for larger roof spans

## 3. UNIVERSAL MODULE CLAMP

- Suitable for all framed solar panels
- Can be used as centre clamp or as end clamp in combination with end cap
- Standard assembly
- · Including equipotential bonding for the solar panels Available in grey and black

## 4. END CAP

- End cap holds the module clamp in its position
- · Elongated end cap to allow for aesthetically pleasing finish
- Available in grey and black

### **CORRUGATED** ROOF

# **EASY INSTALLATION ON THE ROOF**

#### ClickFit EVO Corrugated Roof: easy & quick

ClickFit EVO Corrugated Roof has been specially developed for use with the well-known ClickFit EVO system on corrugated roofs, as are often found in the agricultural sector. This straightforward mounting system consists of just four components and can be installed on both existing and new roofs. Thanks to its universal properties, the system is very quick and easy to mount. Simply install the mounting system on the corrugated roof using the mounting brackets or hanger bolts.

#### **ClickFit EVO mounting bracket**

The ClickFit EVO mounting bracket is secured to the roof panel screws in the purlin, which ensures that the roof remains 100% watertight. The mounting bracket is suitable for corrugation type 177/51; it fits exactly the crest of the roof and is supported by the troughs. This ensures even force distribution and minimum pressure loads, which contributes to the overall robustness of the system.

#### ClickFit EVO corrugated mounting bracket is MCS certified

Meeting MCS recognised industry standards proves the high quality, competency and compliance of ClickFit EVO mounting bracket.

#### The hanger bolt compensates for roof irregularities of up to 10 degrees

With the ClickFit EVO Hanger Bolt, you can quickly install solar panels on all types of corrugated roofs. The hanger bolt is provided pre-assembled and the flexible adapter allows you to easily and quickly compensate for roof irregularities of up to 10 degrees. Using the universal ClickFit EVO click connection fitted to the hanger bolt as standard, you can simply carry on working with familiar components from the ClickFit EVO product line, such as universal rails, module clamps and end caps. As well as being suitable for corrugated roofs, this hanger bolt can also be used on steel roofs, EPDM, bitumen and Arabic tiles.

### ADVANTAGES FOR THE INSTALLER

- 🤣 🛛 Both landscape and portrait positioning
- 🖉 🛛 Four components on the roof
- 🤣 🛛 Only one tool needed
- 🥖 🛛 Quick and easy installation
- 20-year product warranty

#### ADVANTAGES FOR YOUR CUSTOMER

- 100% waterproof
- 🤣 Roof remains intact
- 🤣 Aesthetic design, also available in black
- Extensively tested product
- 🤣 20-year product warranty

#### Mounting bracket or hanger bolt

Both the mounting bracket and hanger bolt are delivered fully preassembled. The mounting bracket has a stepless-adjustable height. Simply use the screw thread to set the hanger bolt to the required height.

#### 2 Fixing with existing corrugated sheet screws

The mounting bracket features a cut-out. This makes it easy to secure the mounting bracket to the corrugated sheet screws.

#### Hanger bolt replaces corrugated sheet screws

Wherever a hanger bolt is inserted, it replaces the existing corrugated sheet screw.

#### 3 Unique click connection

Both the mounting bracket and the hanger bolt have a self-aligning click connection. This makes it easy to install the mounting rail from above.

#### Integrated cable management

Cables and plugs can be held in place neatly and securely at all times in both the mounting bracket and the cable clip. The optimizer can also be easily clicked onto the cable clip.

#### 5 Always the right size

The universal module clamp is suitable for all framed solar panels and can be used as a middle clamp and – in combination with the end cap or end clamp support – also as an end clamp.

# Calculator

In the Esdec calculator you can manage and calculate all your projects, for both pitched and flat roofs. One platform with all Esdec mounting systems for the most reliable calculation of your project.

Save time: manage all your projects on one platform

One calculator for projects on pitched and flat roofs

All calculations are based on extensive testing and the

latest safety standards

Unlimited calculations: use the calculator for your own project calculations without limits on the roof height. The calculator also takes into account the terrain category, snow load and wind zone to provide accurate advice, specific to your project.

Go to eu.esdec.com/en/calculator

# Warranty

ClickFit EVO meets all of the requirements and standards that currently apply. ClickFit EVO comes with a unique 20-year product warranty, thus ensuring the system's quality.

- Use of premium high tech materials
- Extensively tested
- BDA/KIWA certification
- ntering 20-year product warranty
